

Since Indiana has enacted its privacy policy there are virtually no interruptive calls from unsolicited vendors. To allow these solicitations into private homes is an invasion of privacy and should be protected by all. These callers prey on our senior citizens, mentally & physically challenged individuals and others. To allow these types of solicitations is cruel, unnecessary, invasive and unwanted. Please do not allow the FCC or any other organization to pass a preemptive law superceding the Indiana Privacy Act. We enjoy our country's freedoms, which does include the right to privacy.
